

**IN THE ABSTRACT:**

*Following the Claims, please add the Abstract as follows:*

**--Abstract of the Disclosure**

A personal telecommunication device (100) for use as a mobile station of a digital cellular radio network comprises a keypad (105, 221) for allowing a human user to input information to the personal telecommunication device (100) and a display (103, 233) for displaying information to a human user of the personal telecommunication device (100). The personal telecommunication device (100) comprises two mechanically separate structural parts, of which a first part is a keypad part (102, 202, 302, 402, 502, 602, 702) that comprises the keypad (105, 221), and a second part is an amulet (101, 201, 301, 401, 501, 601, 701, 801, 1201) that comprises the display (103, 233). The personal telecommunication device (100) comprises a short distance communication link (106, 222, 231, 322, 331, 722, 731) between the keypad part and the amulet. The amulet (101, 201, 301, 401, 501, 601, 701, 801, 1201) comprises a hanging arrangement (104) by the help of which the amulet is adapted to be worn on the torso of a human user.
